Tow Pilot Training Folder

Inspection of Tow Rope Tow Ring Inspection Tow Rope Splicing Demonstration & Practice Inspection of Tow Hitch Glider Flight Training Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	Training Item	Completion Date	
Inspection of Tow Rope Tow Ring Inspection Tow Rope Splicing Demonstration & Practice Inspection of Tow Hitch Glider Flight Training Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider		completion bate	
Tow Ring Inspection Tow Rope Splicing Demonstration & Practice Inspection of Tow Hitch Gilder Flight Training Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practices simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Tow Rope Splicing Demonstration & Practice Inspection of Tow Hitch Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Inspection of Tow Hitch Glider Flight Training Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practices simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Glider Flight Number 1 Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practices imulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Observe Take Off, Tow, High Tow, Low Tow, Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Turns on Tow, Slack Rope, Observe Glider Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	g .		
Problem & Emergency Release Signals. Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Glider Flight Number 2 Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	· ·		
Observe Take Off, Fly Tow, Observe Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Descending and Climbing in the Wake, Box the Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Wake, Fly Turns and Observe Normal Release. Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Glider Flight 3 Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Fly Take off, tow, box wake, turns on tow and normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
normal release. Observe slow flight, stalls, steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Steep turns, pattern and landing. Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Glider Flight 4 Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	_		
Practice and observe maneuvers as needed. Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Tow Plane Flight Training Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	_		
Tow Plane Flight 1 Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Practice tow, with emphasis takeoff, initial climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Climb, normal release and descent procedures. Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Tow Plane Flight 2 Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Practice tow, with emphasis on climb airspeed control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
control. Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Tow Plane Flight 3 Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	· · · · · · · · · · · · · · · · · · ·		
Practice tow, with emphasis on climb during out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
out of position glider maneuvers. Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	l · · · · · · · · · · · · · · · · · · ·		
Tow Plane Flight 4 Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Practice tow, with emphasis on emergency signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
signals: Glider Problem and Emergency Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	l · · · · · · · · · · · · · · · · · · ·		
Release. Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Tow Plane Flight 5 Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Practice tow, with emphasis on glider rope break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
break training at or above 200 feet AGL. Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Tow Plane Flight 6 Practice simulated tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
Practice <u>simulated</u> tow, review emergency procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider			
procedures: Takeoff emergencies, power failure during climb out, glider cannot release, glider and tow plane cannot release and glider	_		
during climb out, glider cannot release, glider and tow plane cannot release and glider			
and tow plane cannot release and glider	·
